How to use the tables?

You arrange the plan in USOS – hours and ECTS show how to distribute the load evenly.

You book field training places – plan the long blocks (150 h) in advance; short exercises take place in March and October.

You combine specialisations – from the second year, you choose your main path (major), and in the third year, you study an additional one (minor).

You can find the details – the forms of credit and the literature - in the syllabi; the course sheets in USOS.

Do you have questions? Take a look at the Studies tab or write to the Students' Office – we'll help dig up the right solution!
